

EXOSKELETONS

Long-term support for better quality of life and job satisfaction

The exoskeleton for the neck is a cervical support that provides relief to the neck area and cervical spine. The size can be adjusted according to the user. It provides support during all types of overhead activities like ceiling installations or visual inspections.

For you as an employer, this means:

Reduced work absences caused by excessive strain, increased productivity and a stable work environment.

Exoskeleton for the neck – one-size **Relief for cervical spine during overhead activities**

- Excellent comfort thanks to the flexible and adjustable neck support
- Robust, yet feather-light design
- Easy to wear
