

YOUR SUPERHERO

for materials management

**Operating materials get out of hand?
Procurement and logistics steal time and nerves?
Materials management simply costs too much energy?**

THIS LOOKS LIKE A JOB FOR ORSY[®]MAT

ORSY[®]mat are our superheroes for your materials management.

Our vending machines offer you a holistic concept for auxiliary and operating materials. We take care of the delivery, storage and stocking up to the fully automatic replenishment, with a maximum of flexibility and directly at the point of use. In our opinion: Our vending machines are real super talents.

And a super win for you:

Your C-Parts in the required quantity, at the right time, in the right quality directly at the point of use.

Our super strengths:

- Accessible storage
- Highest possible process transparency
- Modular design
- Easy implementation without your IT
- Reduced costs
- Login with all common RFID customer cards
- Fully automatic reordering

Your superpower:

- Optimized warehouse and inventory management
- Automated ordering processes
- Decentralized material supply
- Individual product range
- 24/7 availability of goods
- Lean processes

YOUR SUPERHEROES

for you at a glance

ORSY®mat FP – Flap based vending machine

The flap based vending machine ORSY®mat FP enables the storage and provision of various high-quality and bulky commodities and consumables.

Super strengths:

- Available in ten variants with up to 72 flaps
- Quickly find the right items

ORSY®mat RT – Rotation based vending machine

The rotation system combines high flexibility of the range of items and individually adjustable compartment sizes. This system is suitable for securely guided dispensing of various small or medium-sized items, such as drills, bits and batteries.

Super strengths:

- Individually assembled according to your requirements with regard to assortment variety, item size and quantity
- Offers 4 to 48 compartments per level
- Up to 384 different items
- Dispensing of packaging units or single items

ORSY®mat HX – Helix based vending machine

The helix based system is the optimal solution for dispensing single units of frequently required auxiliary and operating materials, such as gloves, screwdrivers, spare parts, rechargeable batteries, building supplies, PPE and much more.

Super strengths:

- Up to 48 different products and 1,000 units
- Flexible number and sizes of spirals
- Dispensing of single items, advantageous e.g. for gloves
- Fast finding of items due to „storefront effect“

ORSY®mat WGT – Weighing system

The weighing system recognizes article withdrawals on the basis of integrated weighing cells and the system is used for the management of almost all auxiliary and operating materials as well as large-volume items such as protective suits, leather gloves or large grinding discs.

Super strengths:

- Access-restricted simultaneous withdrawals of several items on item level
- Complete stock overview by 24 hours availability of goods
