

PRESS RELEASE

Work environment. Even safer!

Würth Industrie Service at A+A – The largest trade fair for safety and health at work

Bad Mergentheim/Main-Tauber-Kreis. Because safety comes first: Three companies, expert in their field, will once again greet visitors at this year's A+A from 24th to 27th October 2023 in Düsseldorf. At a joint booth A62 in hall 14, Würth MODYF GmbH & Co. KG, Adolf Würth GmbH & Co. KG and Würth Industrie Service GmbH & Co. KG will showcase their comprehensive portfolio of personal protective equipment and work clothes, appropriate stocking and storage systems for the same as well as automated supply solutions for indirect materials.

A+A in Düsseldorf is a leading international trade fair for personal protection, occupational safety and health at work. Keeping true to its motto of the year "Inspirations for a better work environment", safety officers, managers for hazardous materials, stakeholders in the field of occupational safety and health as well as buyers and merchandise managers will find solutions and answers to important questions related to a safe, healthy and sustainably efficient workplace across all sectors. And all of this considering the current megatrends of digitalisation and sustainability. New Work concepts will also provide an insight into the future of work environment.

The smart solution for materials management: ORSY®mat vending machine solutions

The selection of suitable protective equipment is just as important as the availability of the products at the respective place of use. Auxiliary and operating materials like sanding discs, drills, hand tools or protective gloves have a major impact on procurement due to their irregular requirements, low unit costs and a wide variety of items, and their shortage can bring the entire production to a standstill. The key to efficiency in materials management is ORSY®mat – the reliable vending machine solutions. Customers from manufacturing industries can benefit from perfect and organised stocking, automatic replenishment, transparent inventory control and, thereby simply from more productive materials management for indirect materials – from tools and technical chemicals to personal protective equipment (PPE). The system communicates directly with the ERP system of Würth

Industrie Service, thus allowing the customers to monitor their inventory and material withdrawals in real time. Different variants of the vending machine models are available in order to fulfil individual customer requirements optimally. Whether it is the ORSY®mat FP flap vending machine, ORSY®mat HX helix vending machine, ORSY®mat RT rotating vending machine, ORSY®mat DR Light drawer vending machine or even the latest developments like the ORSY®mat WGT weighing system as well as the ORSY®mat CHE hazardous materials system: work gets done better with these stocked vending machines!

Store hazardous materials in a safe and eco-friendly way

Technical chemicals such as brake cleaners, lubricants or corrosion protection sprays are essential in production, maintenance and servicing. They require manual procurement processes or a centrally managed hazardous materials warehouse, either of which costs time and money. How does Würth Industrie Service manage to store hazardous materials in a safe and transparent manner compliant with the law? The ORSY®mat CHE hazardous materials system is the answer to this question. Similar to the vending machines, the system identifies item withdrawals and triggers automatic reordering as per requirement. This means that customers can also rely on an intelligent supply of technical chemicals. The REFILLO® systems are another solution for optimally stocking chemical products. As spray cans are automatically refilled, customers can not only reduce waste, but also lower the disposal costs. And that too in an absolutely safe, cost-effective and sustainable way. As opposed to the conventional aerosol cans based on propellant gas, the expert relies on the optimum ratio between active ingredient and compressed air. The can is refilled in only seven seconds, and is then ready to use. Thus, the systems add value not only for the customers, but also specially for the environment.

Apropos sustainable: The area of occupational safety also requires a conscious approach with environmentally friendly products. At the trade fair, visitors will learn about protective gloves from the ecological product line ECO LINE.

Ergonomic and individual workstations

Thanks to the intelligent workplace systems from Würth Industrie Service, individual, workload-relieving and ergonomically optimised workplace solutions for different work situations and requirements are already a reality today. At this year's A+A, the experts will present the complete package of the product line

CPS®IWS – Innovative Workplace Solutions: from ergonomic work chairs, assembly workstations and anti-fatigue mats to the smart Würth Aluminium Profile Systems (WAPS®) and the organising aids CLIP-O-FLEX® and OPT-I-STORE®. In order to stay fit and healthy despite physical strain, the company will present its range of exoskeletons. As support or assistance systems, the exoskeletons support and offer relief to the arm, wrist, back, neck or knee when the workers perform everyday work, and ensure more productivity and higher job satisfaction in the company.

Along with the innovative system and product exhibits, trained safety experts will be available for expert discussions and individual consultation.

Würth Industrie Service GmbH & Co. KG will be at A+A from 24th to 27th October 2023 in Düsseldorf in hall 14 at booth A62.

Brief profile of Würth Industrie Service GmbH & Co. KG

Within the Würth Group, Würth Industrie Service GmbH & Co. KG is responsible for supplying to the industrial sector. Since its foundation in the year 1999, the company is located at Industriepark, Würth in Bad Mergentheim, Germany with over 1,750 employees.

As a one-stop C-Parts provider, the company offers its customers a specialised product range with over 1,400,000 items: from screws and tools to connection and fastening technology, technical chemicals as well as occupational safety solutions. In addition to the extensive standard product range, the strength of the company lies in its customer-specific, logistical and dispositive supply and service concepts as well as special parts. Under the service brand "CPS® – C-Product Service", the company offers modular solutions customised as per the customer's requirements. These consumption-based and demand-based systems streamline the processes for purchase, logistics and quality assurance while enabling the procurement of small parts in a cost-optimised manner. Logistic and dispositive services such as shelving systems that use scanners or a just-in-time supply using Kanban bin systems play a significant role in increasing productivity.
